DETAILED ACTION

Election/Restrictions

1. Claims 1-104 are pending.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-81, drawn to a method of redirecting data from a messaging host system to a user's mobile device, classified in class 709, subclass 206.
 - II. Claim 82, 87-104, drawn to a system for redirecting data items between a host system and a mobile communications device through a redirector system, a method of key distribution comprising the steps of generating an encryption key for encrypting data items to be redirected to the mobile device, classified in class 713, subclass 170.
 - III. Claims 83-86, drawn to a method of redirecting electronic data items from a host system associated with a user to the user's mobile data communication device comprising the steps of configuring an external redirection event, classified in class 374+.

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention I does not require the use of cryptography. The subcombination has separate utility such as forwarding messages to a wireless device based on rules set forth in the redirector host system.
4. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention I does not require the steps of configuring an external redirection event. The subcombination has separate utility such as a method of redirecting email messages from a messaging host system to a user's wireless mobile device by detecting an email message for the user and forwarding a copy of the message from the messaging host system.
5. Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not

Art Unit: 2155

require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention II does not require the steps of configuring an external redirection event. The subcombination has separate utility such as generating an encryption key for encrypting data items to be redirected to the mobile device.

6. Because these inventions are distinct, each from the other for the reasons given above and the inventions have acquired a separate status in the art as shown by their different classifications restriction for examination purposes as indicated is proper.
7. Applicant is required under 35 U.S.C. 121 to elect a single group disclosed as described above for prosecution on the merits because each of the groups requires different searches in different classes and subclasses.
8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2155

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
